

The Hyperedge Fellowship

The Hyperedge Fellowship offers creative young founders the ability to drop out of college or high school in order to pursue their web3 dreams. Hyperedge fellows receive \$100,000 and support from our expansive global network to build out their projects.

About

Formal schooling can give you the tools you need to excel in a given field, but it can also limit those who want to pursue a novel career path — if you are working in the web3 space, your schooling has little real-world application.

Hyperedge wants to provide young entrepreneurs and founders with the tools they need to skip or stop out of school and chase their web3 dreams. To us, web3 is all about breaking down geographic and demographic barriers. We care more about your functional skills than your resume. If you have crypto experience and are passionate about the space, we want to connect with you.

The Offer

If you are willing to drop out of college or high school to focus on web3, we encourage you to apply for the Hyperedge Fellowship program. We welcome applications from anywhere in the world and accept them on a rolling basis — there are no deadlines.

As a Hyperedge Fellow, you receive the following:

- a **\$100,000 grant** to fund what you want to build and grow
- **The support and connections of the Hyperedge team:** a global network of founders, investors, and partners, representing the top minds in crypto.

If you would like to apply, please send your project details and a blurb about yourself with the subject line “[Fellowship Application] Name” to talent@hyperedge.capital. Let us give you the funding and network you need to succeed!

FAQ

You do not need a team to apply — we review applicants on an individual-basis. You also do not have to have company or fully built product ready to launch. You simply need to demonstrate meaningful progress toward a tangible goal.

If you are feeling lost about how to present your company vision, we recommend creating a short pitch deck or prospectus. These tools make it easy to clearly and concisely describe what you’re doing.
